The Management Information Systems (MIS) department in the College of Business Administration at San Diego State University (SDSU) is seeking applications for one full-time, tenure-track business analytics/statistics position at the assistant-professor level. The appointment will begin in the fall semester of 2015. Salary will be commensurate with credentials and experience.

The person holding this position will be responsible for developing and teaching graduate and undergraduate courses in statistical analysis, data management, and business analytics. Additional teaching assignments in operations management and information systems are possible, depending on background and qualifications. Qualified applicants will have a doctoral-level degree in statistics or a related discipline by August 2015 and must have a record of teaching excellence and quality scholarship. Ideal candidates will be expert in various aspects of statistics, business analytics, and data management. Strong analytical capabilities, including quantitative research methods should be demonstrated through examples of publication-quality research. Experience in grant writing and conducting grant-funded and multidisciplinary research is desirable.

The MIS department is a multidisciplinary department, which includes eleven full-time tenured faculty in the areas of supply-chain management, information systems, statistics/business analytics, and business communication. The department offers undergraduate and graduate degrees in information systems; MBA specializations in supply-chain management, information systems, and project management; and a Master of Science in Information Systems (MSIS) degree. The College of Business Administration enrolls approximately 4500 undergraduate business majors and about 600 graduate students pursuing the MBA, MSIS, and Master of Science in Accountancy (MSA) degrees. San Diego State University is the oldest and largest university in San Diego and the third largest in California. It offers 89 bachelor’s degrees, 78 master’s degrees, and 22 doctoral degrees across seven colleges and two campuses. The university is proactive in forming partnerships with business and industry as well as with state and federal governments. The MIS department is supported by an advisory board consisting of business leaders from the region who provide curriculum advice, student internships, and research projects.

SDSU is a large, diverse, urban university and Hispanic-Serving Institution with a commitment to diversity, equity, and inclusive excellence. Our campus community is diverse in many ways, including race, religion, color, sex, age, disability, marital status, sexual orientation, gender identity and expression, national origin, pregnancy, medical condition, and covered veteran status. We strive to build and sustain a welcoming environment for all. SDSU is seeking applicants with demonstrated experience in and/or commitment to teaching and working effectively with individuals from diverse backgrounds and members of underrepresented groups.
Apply via Interfolio at http://apply.interfolio.com/26335. Review of applications will begin in September 2014 and will continue until the position is filled. The contact person for this position is:
