Assessment: It’s Everybody’s Business

Assurance of Learning = Assessment

1. What do we want students to know when we’re finished with them?
   - Student Learning Outcomes (SLOs)

2. How do we know if they know it?
   - Measurement & Data Collection

3. So, do they know it or not?
   - Results

4. Now what do we do?
   - Making improvements to enhance learning/Closing the Loop

Need ideas to ease your grading burden?
• Grading with a rubric is almost guaranteed to cut down your grading time, resulting in better papers, and allowing you to provide more feedback to your students.
• E-mail Kathy Krentler for a copy of a very simple "primer" on developing and using rubrics for grading.
